PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 4+ years of experience building and operating CI/CD pipelines and AWS infrastructure for enterprise clients across the US, Europe, and India. Comfortable owning automation end-to-end — provisioning with Terraform, deploying to Kubernetes, and keeping systems observable with Prometheus and Grafana. Focused on cutting deployment time and reducing production incidents through practical, reusable automation rather than one-off fixes.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, IAM, S3, Lambda, EKS, Control Tower, Organizations, AFT)

Infrastructure as Code: Terraform, TFSec

CI/CD: GitHub Actions, Azure DevOps, GitLab CI

Version Control: Git

GitOps: ArgoCD

Containers: Docker

Container Orchestration: Kubernetes, Helm

Monitoring & Observability: Prometheus, Grafana

Code Quality: SonarQube

Artifact Management: JFrog

Scripting: Python, Bash

Operating Systems: Linux, Windows

PROFESSIONAL EXPERIENCE

Infosys

Senior Associate Consultant

Feb 2025 – Present

Noida, India

Client: Charter Communications, USA

Cloud & DevOps Engineer

- Deployed and maintained highly available microservices on AWS EKS using Docker and Helm, achieving 99.9% application uptime through Application Load Balancer and Auto Scaling configuration.
- Built and managed CI/CD pipelines using GitHub Actions, automating build, test, and deployment workflows and reducing deployment time by 30%.
- Provisioned AWS infrastructure using Terraform, including VPC, EC2, IAM, and Security Groups, improving deployment consistency and minimizing manual effort.
- Developed Python-based AWS Lambda functions for automated EBS snapshot cleanup and implemented S3 lifecycle policies to optimize storage costs.

Client: Aperam, Luxembourg

Platform Engineer

- Deployed AWS Account Factory for Terraform (AFT) within an AWS Control Tower environment to automate standardized AWS account provisioning and governance across AWS Organizations.
- Developed Azure DevOps CI/CD pipelines to automate Terraform validation, security scanning (TFSec), planning, and deployment of AFT infrastructure.
- Integrated TFSec into the Terraform deployment pipeline to enforce Infrastructure as Code security best practices and detect configuration issues before deployment.
- Built and maintained reusable Terraform modules and automated infrastructure deployment workflows, improving consistency, scalability, and operational efficiency across AWS environments.

Client: Elisa Telecommunication, Finland

Cloud & DevOps Engineer

- Built and maintained GitHub Actions CI/CD pipelines integrated with SonarQube to automate code quality checks, reducing deployment failures by 50% and improving release speed by 35%.
- Containerized applications using Docker and deployed workloads on Kubernetes, ensuring scalable, highly available, and consistent application deployments across environments.
- Implemented infrastructure and application monitoring using Prometheus and Grafana, configuring dashboards and alerting to improve observability and accelerate incident resolution.
- Automated Linux operational tasks using Bash scripting, streamlining routine maintenance activities, reducing manual effort, and improving operational efficiency.

ACHIEVEMENTS

- Migrated 19 on-premises applications to the cloud, ensuring stable and reliable production operations throughout the transition.
- Developed a GitOps proof-of-concept using ArgoCD, enabling automated Kubernetes deployments that were subsequently adopted by client teams.

PERSONAL PROJECTS

PRISM – AI-Powered CI/CD Failure Intelligence Platform | github.com/aznavneet/prism

- Built a GitHub Actions workflow that automatically triggers on CI/CD pipeline failures to collect build and log data for analysis.
- Developed a Python script that analyzes pipeline failure logs and generates a root cause analysis (RCA) report as part of the PRISM CI/CD failure intelligence project.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- AWS Certified Cloud Practitioner
- GitHub Foundations
- Containers & Kubernetes Essentials
- Cisco AI Practitioner

EDUCATION

B.Tech, Electronics and Communications Engineering — Netaji Subhash Engineering College, Kolkata
May 2017 – Jun 2021 | GPA: 8.41
